

## **Invitation to Host the iwCLL 2023 Biennial Meeting**

The iwCLL Biennial Meeting focuses solely on advancing the understanding and treatment of chronic lymphocytic leukemia (CLL) and related lymphoproliferative disorders. Founded in 1979, it is now the largest international meeting dedicated to advancing state-of-the-art and emerging concepts – from laboratory-based research to the clinic – in the pathobiology and treatment of these blood cancers. The Biennial Meeting which attracts around 1200 delegates from over 40 countries is intended to provide a forum that promotes the exchange of information and encourages collaboration among international leaders and scientists interested in CLL and lymphoproliferative disorders.

The iwCLL is now actively seeking applications from parties interested in hosting the **2023 Biennial Meeting**.

Prospective hosts are invited to read the Information and Instructions to Host the 2023 Biennial Meeting and Appendices.

Applications should be submitted by email to the iwCLL Chairperson ([iwclloffice@gmail.com](mailto:iwclloffice@gmail.com)) by **31 July 2020 at 17:00 CET**. This is a firm deadline so that the iwCLL Executive Board is in a position to make the final selection and advertise the date and location at the XIX iwCLL Meeting in Kraków, Poland. No extensions to the deadline will be given. The successful host will be informed by **28 August 2020**.

Please note that the iwCLL does not accept applications from potential hosts from remote areas of the world. This is due to difficulties in securing industry support, flight costs for the major scientific contributors and the costs to delegates attending. The iwCLL does however hold regional conferences in remote areas of the world. Please contact the iwCLL Office if you are interested in holding a regional conference.

Any questions relating to the application process should be directed to the iwCLL Office [iwclloffice@gmail.com](mailto:iwclloffice@gmail.com)
